

Funding opportunity

Spread and scale of community-based primary health care and eHealth innovations

Discoveries for life / Découvertes pour la vie

Funded projects and programs are often implemented successfully in one area without attention to the possibility of spreading and scaling beyond. This funding opportunity will support research teams to adapt existing approaches known to improve the health of Canadians to new areas or populations.

\$700,000
available

enough to fund
about 10 grants

Supported research areas

Community-based primary health care

eHealth innovations
